

Download instructions for a desktop version of Genworth's

Your Mortgage Plan *Note: This tool is formatted for PC users.*

1. Click on the **Download** link.
2. Depending on your browser settings, a download dialog window will appear allowing you to select a destination folder to save the file. You can choose any folder on your computer. After selecting a folder, click on **Save** or **Ok**.
Note: If your browser setup is such that files are automatically downloaded to a pre-selected folder, you don't need to perform any action for this step.
3. At this point, depending on your browser settings, you may see a **Download Complete** dialog window. Simply close the window. *Note: If you're using the Firefox/Netscape browser, simply click on the **X** at the top-right corner of the download dialog window.*
4. Navigate to the folder where you downloaded the file. Double-click on the saved file (named Genworth_MPT.zip). Use any standard zip tool (Winzip™, PKZip™, WinRAR™, etc...) to extract the files to any folder on your system.
5. Open up the folder to which you extracted the files in step 4 above. You'll see a **Genworth_MPT.exe** file. Double-click the file to begin using the Genworth Mortgage Planning Tool.

TIP: For easy access to the calculators, it is highly recommended that you create a shortcut to the Genworth_MPT.exe file. To create a shortcut, simply right-click the file and select **Send To Desktop (create shortcut)**.
